Consumer Reviews

[Product XYZ2000](#)

Please note that this review contains input from a consumer and the manufacturer, Power Chair. We strongly recommend that you read both parts of the review to see how Redman has addressed the problems that have occurred with Mr. xxx chair.

From Chris xxx of xxx, NY:

Why did you purchase the product?
It was perfect for my needs.

How well did the product meet your needs?
Very well.

Features you like: With this Redman standing wheelchair my health has improved. By "standing" about once an hour, which decreases my chances of contracting respiratory infections, the standing wheelchair has eliminated the problem of extended pressure from prolonged sitting. The improvement in blood circulation from being able to straighten my legs while standing has nearly eliminated all the swelling in my feet which was usually brought on by prolonged sitting. My doctor mentioned that by standing and putting pressure on the bones in my legs, they would become less brittle.

Features you disliked:

1. The first day I received the wheelchair the charger required a 15amp fuse. It came with a 10amp fuse. Highgate replaced the fuse out of their pocket.

2. The foot straps were too short. Highgate out of their pocket sewed on extra Velcro to make them longer.

Xxx of Power Chairs replies:

Regarding the letter received from ABLEDATA, the chair mentioned was one of the original chairs manufactured by Redman Power Chair and has been returned and received free updates.

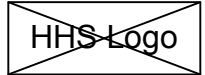

- The charger problem / fuse has been resolved with a new system.
- The back actuator breaking has received a frame modifications change that improves the durability.

Please let me know if there is anything else you need.

Respectfully,
xxx
